

Air Pollution (Effects on Humans) Policy Sub-Category Scores (2008 EPI)

Robinson Projection

Air Pollution Policy Scores (humans)

Index Description:

The Air Pollution (Effects on Humans) Policy Sub-Category of the Environmental Health Objective from the 2008 EPI is a unitless score based on a theoretical range from 0 to 100 (0 represents the farthest from the target and 100 represents the attainment of the target). Scores are a weighted average across three constituent indicators: Urban particulates, Indoor air pollution, and Local Ozone. This sub-category weight is 12.5% of the overall EPI.
