

Climate Change Policy Category Scores (2008 EPI)

Robinson Projection

Climate Change Policy Scores

Index Description:

The Climate Change Policy Category of the Ecosystem Vitality Objective from the 2008 EPI is a unitless score based on a theoretical range from 0 to 100 (0 represents the farthest from the target and 100 represents the attainment of the target). Scores are averaged across three constituent indicators: Emissions per capita, Emissions per electricity and Industrial carbon intensity. This category weight is 25% of the overall EPI.
