

Fisheries Policy Sub-Category Scores (2008 EPI)

Robinson Projection

Fisheries Policy Scores

Index Description:

The Fisheries Policy Sub-Category of the Productive Natural Resource Policy Category from the 2008 EPI is a unitless score based on a theoretical range from 0 to 100 (0 represents the farthest from the target and 100 represents the attainment of the target). Scores are averaged across two constituent indicators: Trawling Intensity and Marine Trophic Index, and countries must have at least one to be included in the sub-category score. This sub-category weight is 2.5% of the overall EPI.
