

Forestry Policy Sub-Category Scores (2008 EPI)

Robinson Projection

Forestry Policy Scores

Index Description:

The Forestry Policy Sub-Category of the Productive Natural Resource Policy Category from the 2008 EPI is a unitless score based on a theoretical range from 0 to 100 (represents the farthest from the target and 100 represents the attainment of the target). The forestry sub-category score is based on the Change in Growing Stock indicator. This sub-category weight is 2.5% of the overall EPI.
