

Water (Effects on Humans) Policy Sub-Category Scores (2008 EPI)

Robinson Projection

Water Policy Scores (humans)

Index Description:

The Water (Effects on Humans) Policy Sub-Category of the Environmental Health Objective from the 2008 EPI is a unitless score based on a theoretical range from 0 to 100 (0 represents the farthest from the target and 100 represents the attainment of the target). Scores are an unweighted average of two indicators: Adequate sanitation and Drinking Water. This sub-category weight is 12.5% of the overall EPI.
